

# *Straight Shooter*

Feeders for mailing,  
printing and packaging

**LF-12**

## LF-12 High Speed Laser Printer Feeder

***Straight Shooter brings real  
innovation to friction feeding!***

Revolutionary features like *Buckle Separation™*, repositionable feed belts and PLC logic make the LF-12 the ideal feeder for high speed laser printers

Now you can get the most out of your high speed printer with the all new Straight Shooter LF-12. Top loading means continuous running without the delays caused by reloading traditional envelope hoppers.

The LF-12 features our unique floating acceleration table offering simple integration with NO CHANGES to the printer! Simply open the manual feed tray, slide the feeder in, and you're ready to run!

## ***Straight Shooter LF-12***

### ***Make your laser printer an envelope workhorse!***

The LF-12 was designed to make your laser printer more productive. Capable of holding up to 500 envelopes, the top-load design means no annoying delays for reloading envelopes! The LF-12 easily handles envelopes, postcards, and other hard to feed pieces.

#### **No Interface Required!**

With our unique floating acceleration table, The LF-12 easily rolls up to your printer with no wiring, mechanical latching or removal of trays! Simply set the feeder up, roll into place and run!

Competitive feeders require removal of the printer's manual feed trays sacrificing versatility.  
***Not with Straight Shooter's LF-12!***

If you are running #10 envelopes with the LF-12 and need to print on a different size piece, simply slide the feeder back and use the manual tray as usual! ***Versatility!***

#### ***Straight Shooter takes friction feeding to a new level with these exclusive features:***

- \* Solid, heavy-duty paper guides that extend ALL THE WAY THROUGH THE FEEDER
- \* Repositionable Feed Belts -- Lets you customize the feeder for every piece!
- \* Independently Adjustable Separators... as many as you like!
- \* Heavy duty shafts and bearings for long life.
- \* Use as many separators and belts as each job requires
- \* Completely tool-less setup!

#### ***Buckle separation™ for smoother feeding!***
